

THE 2HR AQUARIST

# APT FIXLITE

S/Y52K41P

APT FIX-Lite contains a proprietary mix of carboxylic acids. These carboxylic acids selectively inhibit various processes in algae cells, while leaving higher order plants undisturbed due to their thicker cuticle layer. The active components react quickly with algae, but is broken down completely by biological microbial action thereafter, resulting in no bio-accumulation in the aquarium ecosystem in the long run. This enables APT FIX-Lite to be a safe and effective inhibitor for various freshwater algae.

## CONTENT ANALYSIS:

Water (H <sub>2</sub> O):	>91%
Propanediol:	<7%
Carboxylic acids:	<2%

## USAGE GUIDELINES

For aquarium use only. Keep out of reach of children.

## STORAGE

Store away from direct sunlight.

Unopened shelf life: 4 years.
