

Aqua Soil – Amazonia Packaging Redesign

ADA will introduce a new packaging design for Aqua Soil – Amazonia, an ideal substrate product for aquatic plants. The current packaging design with a printed thriving aquascape will be replaced with the new design, starting later this month. Please note that the volume and high quality of the product, made of 100% black soil, will remain the same, as well as product code and price.

Previous design

New design

* "AMAZONIA" in gold color letters.

New packaging design on the following products:

Product Code	Product Name
104-031	Aqua Soil - Amazonia (3l)
