

DOOA, an inspiring brand, helps you enjoy aquatic plants more freely. Minimal and easy, and designed as a platform allowing everyone to nurture plants indoors. Feel closer to nature, and bring beauty into your life.

JUNGLE SOIL JUNGLE BASE

Special soils for Paludarium

Release announcement of Jungle Base • Jungle Soil

Shipments start on December 17th, 2019.

Jungle Soil is natural black soil based containing moderate nourishment blended with soil microorganisms and anthracite effective for the growth of plants. Jungle Base is pumice based blended with soil microorganisms and charcoal powders essential for the growth of plants. By preparing a good soil environment, healthy plants with strong roots grow. Because excessive nourishment could result in algae outbreaks, it does not contain nutrients purposely. Spreading Jungle Base on the bottom where water tends to stagnate ensures breathability in the substrate and prevents plants from root rot. In order for the products to be used up fully for small aquarium tanks for Paludarium, they come in small packages.

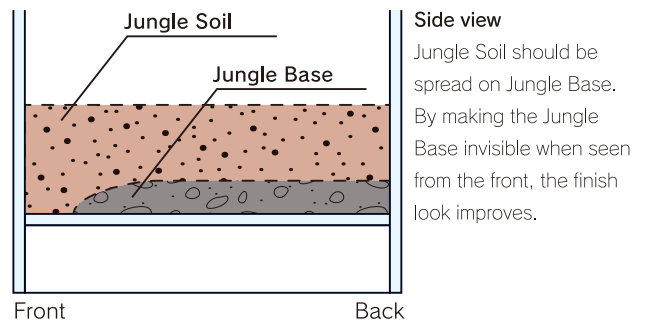

Jungle Base 200mL

Jungle Soil 700mL
