TERRA PLATE

Easily enjoy epiphytic orchids with Terra Plate
Start shipping now

Bulbophyllum retusiusculum

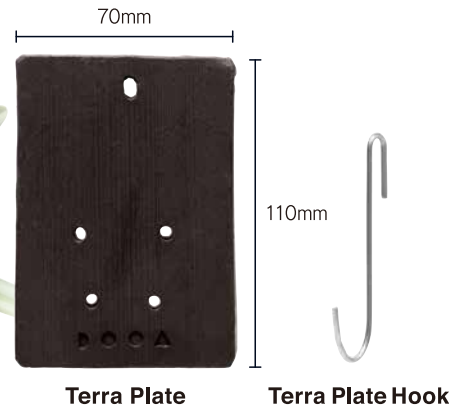

↑ **1 year later**

Well absorbent Terra Plate is a product developed to enjoy epiphytic orchids.

It is a ceramic plate with the same material as Terra Base, and can be used by attaching epiphytic orchids with a small amount of moss using Terra Line. By using a designated hook, it can be hooked on Neo Glass Air. It is a suggestion to easily enjoy epiphytic orchids as interior decorations.

Supply water by soaking the whole Terra Plate in water about once a week. As time advances, roots of the epiphytic orchids start covering the Terra Plate.
