

DOOA HAND SPRAY

New Product Coming

Hand Spray, released as an ADA LAB exclusive product, is now available as a DOOA product line, in response to popular demand. Sprays a fine mist, allowing to evenly water the plants, and comes with an 18cm long nozzle, making it easy to spray the mist precisely to the desired spot, and a cation exchange resin, removing Calcium and Magnesium from the tap water, which helps to avoid buildup of white dirt (limescale) on glass surface and plants. The water softening cation ion exchange resin is effective for approximately 100 times use with a 500ml spray bottle.

- ※Includes 50ml of cation exchange resin.
- ※The cation exchange resin lifespan may differ depending on environment used in and tap water quality.
- ※If the rare event occurs whereby the cation exchange resin enters the nozzle, please remove the tip of the nozzle to take out the resin.
- ※The ion exchange resin included in this product cannot be reused.
