

New ADA layout materials

ADA is now adding new layout materials, the characteristics of which are clearly laid out below.

106-844 4537934068449

Japan Stone 8kg

This stone's surface has irregular lines in it, and overall looks more rounded than Ryuoh Stone. Characterised by a slightly bright colouring.

106-845 4537934068456

Jagure Stone 8kg

In an aquascape this stone's bluish-black, cooling hues and roundish depressions evoke the passage of time and flow of water.

106-846 4537934068463

Gatto Stone 8kg

A stone of rounded, river-stone character with irregular, rough depressions and lines.

106-847 4537934068470

Tangerine Layer Stone 8kg

Distinctive stone with uniform stratification and a mix of milky white, orange and grey.

106-848 4537934068487

Living Stone 8kg

Stones resembling lava whilst having rich variation due to craggy shape. Smaller than other stones in the line-up, these work especially well in small sized aquariums.

106-248 4537934062485

Slim Wood 5 (20pcs)

Introducing S size of the highly popular layout material, Slim Wood. A bundle that can easily be used in a small aquarium tank.

106-249 4537934062492

Root Branch (500g)

Extremely fine branch layout material. Recommended for intricate layouts or to be tied onto larger driftwood.

*Size of each stone: 5-15cm

Due to their natural nature, physical properties of contents may have variation.

*Tangerine Layer Stone and Bling Stone have the same hardness and pH increase as Ryuoh Stone.

*Size of Slim Wood (20pcs): 7-15cm.

*Slim Wood may float at first but will sink after about a week submerged. (Please weigh down with heavy stones)

*Size of Root Branch(500g): 15-40cm.

*Root Branch does not have a tag attached.
