

ADA LAYOUT MATERIALS KUMU

Release of the new layout material series KUMU

The new small-sized layout materials series from ADA, "KUMU", is being released. A total of 24 material types across 4 categories in the lineup. Not just for use in small glass cases as paludarium layout material but for varied application as a decorative material for enhancing compositions and detailing scenic arrangements in Nature Aquarium.

About package of KUMU series

Wood is WO, stone is ST, gravel is GR, sand is SA and each is numbered according to its characteristics and type.

The standing pouch can be displayed standing alone or hanging on a wall mounted display.

The material within is vacuum packed to prevent wear.

Packaged in stand-up pouches, allowing customers to choose the amounts they want without getting dirty.

Please see the next page for the lineup.

WO-01
Horn Wood Chip

Small pieces of straight Horn Wood. Many are pointed and give a sharp impression.

WO-02
Horn Wood Pieces

Small, curved pieces of Horn Wood. Can create flowing lines when thoughtfully combined.

ST-01
Ryuh Stone

Stone of a cool color evocative of a reef. Its pointed forms make for easy combining.

ST-02
Ohko Stone

Of a yellowish color and characterized by its bumpy surface, it hardly affects water quality.

ST-03
Yamaya Stone

Its bluish-black angular shapes match layouts easily, even placed without adornment it makes a layout impressive.

ST-04
Lichen Stone

Characterised by its streaked surface and rounded form.

ST-05
Jagure Stone

Its smooth, rounded form is ideal for use in representations of clear streams.

ST-06
Red Slate Stone

Distinctive banded red and white hues. Flat and rough, it is easy to stack stonewall-style.

ST-07
Buff Layer Stone

Easily strengthen a composition's sense of unity by aligning the stripes of its surface.

ST-08
Red Lava Stone

Use its porous reddish-brown hues in combination with plants to bring out the green.

ST-09
Black Lava Stone

A very versatile and porous material that can be attached moss and epiphytic plants.

GR-01
Flat River Gravel S

Flat gravel with carved corners evocative of Japanese riverbeds. Effective for producing a refreshing feeling.

GR-02
Flat River Gravel

Of the same shape and character as the S size. Can make for realer expressions when used in combinations.

GR-03
Hazel Gravel S

Distinctive grains of sharp shapes with warm hues. It helps with detail creation, like scattering over sand.

GR-04
Hazel Gravel

With a distinctive reddish-brown and cream colored marble pattern, it also works well in paludariums.

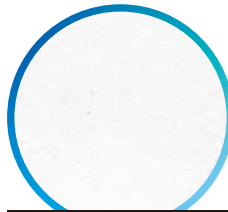

GR-05
Maize Gravel

Black, brown and red grains mixed into an overall yellowish color for a stylish look.

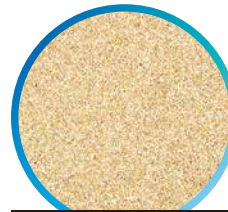

GR-06
Rose Gravel

A red material with some transparent grains. Its color changes little even when wet.

SA-01
Branco Sand

Almost pure white. Produces a fantasy effect, and can also be used for color adjustment when mixed with other sands.

SA-02
Ivory Sand S

Decorative sand of a standard color which also goes well with stone and wood.

SA-03
Ivory Sand

Standard color. Combine with the S size for enhanced detail.

SA-04
Blond Sand S

Its color, deeper than Ivory Sand, gives it a calming impression.

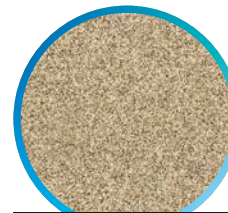

SA-05
Blond Sand

Of coarser, more angular grain than the S size. Used effectively it can greatly change a layout's impression.

SA-06
Vanilla Sand

Cream colored grain with some blacks mixed in, not too eccentric a color.

SA-07
Brook Sand

Colors evocative of downstream sediment deposits which give a layout a calm impression.
