Features of each product in the MINI NA SET 150

Cube Garden

W150xD150xH220mm,4mm glass thickness

Made of the same high-quality clear glass as the existing Cube Garden series, with glass thickness of only 4mm, the thinnest among ADA aquariums, to maximize the spacious appearance of the small tank.

*Including Aqua Soil – Amazonia Ver.2 1L and 1 bag of Bacter R

Bacter R

Bacter R is the bacterial agent for substrate made of natural porous material and nitrifying bacteria in drought dormancy suitable for aquatic environment of Nature Aquarium. Its product name comes from the “rapid” decomposition of ammonia and nitrite.

Bell Glass Mini

Our brand new CO₂ diffuser exclusively developed for Mini NA Set. After trial and error to prevent excessive CO₂ addition in small aquariums, we achieved an unique design that has never been seen before. Its product name is inspired by the shape of a bellflower.

Total length
95mm

New method for CO₂ addition

The CO₂ is gradually dissolved into the water as bubbles slowly fill inside of the main body. This helps prevent excessive CO₂ addition, which is common in small aquariums.

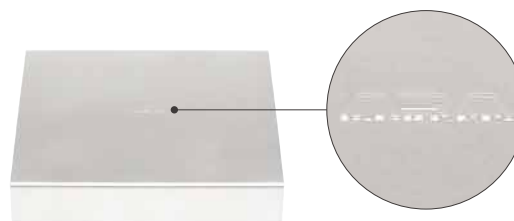

Counter function

You can see the number of air bubbles as a guide to determine the amount of CO₂ to be added.

Metal Base Mini

A stainless steel stand for the aquarium made of SUS304, the same material used in the Super Jet Filter. ADA logo engraved on the top.

Size: W150xD150xH30 (mm)

Metal Cover Mini

A stainless steel cover (SUS430) for Magnet Light G Slim. Open sides allow easy addition of liquid nutrients without moving the lid.

Size : W150xD150xH30 (mm)

Magnet Light G Slim

10W small illumination lamp with 20 high brightness white LEDs. The brightness is adjustable up to six levels. It can be attached to the Metal Cover Mini to reduce glare whilst integrating seamlessly with the system. Timer compatible with memory function.

Front

Back

*USB power adapter is not included. Please use a Type A USB adapter up to 5V2A.

Stream Pump Mini

This compact in-water pump generates the suitable water flow to grow aquatic plants in small aquariums. Its quiet operation is suitable for desk areas. Adjust the water flow using a knob on the bottom based on your layout.

Size: W38xD42xH40 (mm)

*USB power adapter is not included. Please use a 5V1A or higher USB adapter (Type A).

CO₂ System 74-DA

The system uses the fixed pressure reduction (0.3MPa) to add CO₂. This set includes a Forest bottle and a hook. It can be attached to the tanks with glass thickness of 4-6mm. Optional NA Control Timer II and EL Valve (Solenoid valve) is connectable to branch CO₂. Besides CO₂ Forest Bottle for replacement, by using in conjunction with an optional CO₂ adapter, it is compatible with larger CO₂ cylinders.

The set includes: CO₂ Regulator, CO₂ Forest Bottle, CO₂ Metal Hook and Silicone Cushion
