

DOOA T-H METER II now on sale with the new design

Last September, the DOOA T-H Meter was released and received widespread praise. We are excited to introduce the upgraded 'DOOA T-H Meter II,' featuring a new white dial and frame for improved visibility while keeping the same sleek design. By monitoring the temperature and humidity inside the glass case, you can maintain an optimal environment for terrestrial plants, preserving their natural beauty for longer. With these updates, the product code, EAN code, and product name will change. Please also note that due to increased raw material costs, the new model will be repriced from the previous one.

T-H METER II
Size : Ø54xH10.5 (mm)
Frame:White, Face:White
