

ADA NATURE AQUARIUM

GARDEN STAND 900 / 600

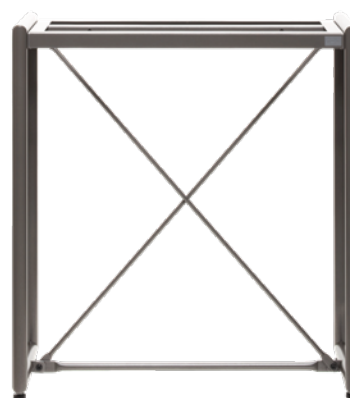

Now Available

The "Garden Stand" has been renewed and is back on the market! While retaining its simple design and durability, we've updated the main body color and refined its details to offer it as a new and improved product. The new color, a premium gun metallic silver, makes a sense of unity with lighting fixtures. As with the previous model, the new Garden Stand series is designed for easy assembly, making it ideal for in-store stocking and convenient for customers to carry home.

GARDEN STAND 900

Designed for use with the Solar RGB series, this model comes with dedicated mounting brackets for attaching the stand. No additional purchase or installation of brackets is required.

GARDEN STAND 600

Designed for use with the Aquasky series, this model does not include dedicated mounting brackets for stand installation.

The dedicated rack that allows placing CO₂ system 74 and Green Brighty series on the main unit will also be released shortly.
