

ADA NATURE AQUARIUM

# ADAPTER COOLING PLATE

ADAPTER COOLING PLATE is an aluminum plate developed specifically for AC adapters, prioritizing safety and design. By flipping it upside down, you can safely and correctly install AC adapters for AQUASKY RGB II 600, as well as the smaller AC adapters used in previous AQUASKY series models. The aluminum material, which has high thermal conductivity, efficiently radiates heat from the AC adapter. High temperatures can cause AC adapters to overheat and potentially shorten their lifespan. You can use your electrical devices safely by ensuring proper heat radiation and enjoy a comfortable aquarium experience.

**Compatible models**

AQUASKY RGB II 600  
SOLAR RGB LIMITED EDITION  
PALUDA LIGHT II 600  
AQUASKY RGB 600  
PALUDA LIGHT 600
