

## ADA NATURE AQUARIUM

# CO<sub>2</sub> Beetle Counter – Relaunch Announcement Special Edition Package (Limited First Edition)

special edition package of the CO<sub>2</sub> Beetle Counter

Since its debut in 1993, the CO<sub>2</sub> Beetle Counter has been highly acclaimed for its distinctive and iconic design and it has become one of the most popular items among ADA Nature Aquarium products. However, due to the declining number of skilled glass craftsmen, production became increasingly difficult, and the product was regrettably discontinued.

We are now pleased to announce that stable production by new craftsmen has resumed and it makes regular shipments possible once again.

This year also marks the 10th anniversary of the passing of ADA founder, Takashi Amano. In honor of this milestone, we will release CO<sub>2</sub> Beetle Counter, which is widely regarded as one of Amano's finest product designs with a special edition package featuring a commemorative band. (Limited quantities available for the initial release only.) Please note that orders will be accepted on a first-come, first-served basis, and the special banded edition will be discontinued once the allocated quantity is reached. Any orders placed thereafter will be shipped with the standard packaging without the commemorative band.

\*To coincide with this relaunch, we will also be highlighting some of Takashi Amano's most original and beloved product designs—CO<sub>2</sub> Beetle Counter, AP Glass, and Cabochon Ruby—on the web edition of Aqua Journal and across social media. We expect increased interest from customers, so we kindly encourage you to feature these products prominently.
