Enjoy creating with your imagination

ADA layout material "KUMU" is a decorative material used for the layout of Nature Aquarium and paludariums. You can expand your range of

expression by combining your favorite materials from a lineup of multiple materials such as stone, driftwood, sand, and gravel. Enjoy creating layouts by combining them with your imagination. KUMU has a lineup of 24 types. Each pack is designed with an appropriate amount to make it easy to try, and is numbered according to material category: ST = stone, GR = gravel, SA = sand, and WO = driftwood. Each package is shrink-wrapped and deaerated to create a clean package that makes it easy to see and select the materials.

[The package is designed to see the contents clearly and pick-up easily.]
