

# DOOA Glass Pot MARU 130

## Newly released as a set with Magnet Light G

[ Available for shipment now ]

DOOA Glass Pot MARU 130, larger sized popular Glass Pot MARU, is newly released as a set with Magnet Light G. It is larger than the conventional Glass Pot MARU and fits better when the Magnet Light G is placed on the lid. The special lid and holes on the side make it easier to maintain moderate humidity than the conventional MARU, making it suitable for growing plants that prefer a humid environment. It is also suitable for creating mini Paludarium layouts with Lagenandra, jewel orchids, driftwood, and stones, which have been difficult to fulfill with the conventional Glass Pot MARU.
