

# ADA NATURE AQUARIUM METAL PIPE FLOW

Available for shipment from late April.

The stainless steel Metal Jet Pipe has been renewed to a new form with new functions. The new Metal Pipe Flow Series has an outflow nozzle that is horizontally movable, enabling the outflow direction to swivel to the left and right. This function enables us to create a water flow that is suitable for various layout styles. The inflow pipe has a detachable plug at the tip for easier maintenance.

Since the product is made of stainless steel, please do not use Superge, but use a Spring Washer or sponge for maintenance. The Metal Pipe Flow Series is robust, therefore we would love you to try it out for your display aquariums and recommend it to your customers.

Product Code	EAN Code	Product Name	Pipe diameter / Height / Inside dimension of a curved section of pipe
105-113	4537934051137	<b>Metal Pipe Flow V-1</b>	<b>Ø13 / H250 / 54 (mm)</b>
