

# MAGNET LIGHT WIRE ARM

The new "DOOA Magnet Light Wire Arm" is now available. Made from stainless steel with magnetic properties, it is resistant to rust and allows for easy installation of Magnet Light. The paint used is the same matte white as the "Magnet Light G Slim," creating a seamless integration between the light and the stand. It is compatible with all sizes of the Neo Glass Air and can be installed on aquariums with glass thicknesses up to 5mm. The wire-constructed body has a modest presence, blending well with open-style layouts. It is also compatible with the previously unsupported Neo Glass Air W300xD180xH120 (mm).

#### Compatible Aquarium Sizes for Magnet Light Wire Arm

- ☐ All sizes of DOOA Neo Glass Air
- ☐ Cube Garden W200xD200xH200 (mm)

\*The maximum glass thickness for compatible aquariums is 5mm.
