NEO GLASS WOOD BASE
150×150

We are pleased to announce the release of Neo Glass Wood Base, a newly developed wooden stand designed exclusively for the Neo Glass Air series. This product enhances the stability of aquarium setups while preventing chipping of the glass corners, offering both practicality and peace of mind. When used together with accessories such as Magnet Light Stand, it reduces the risk of damage caused by sliding adjustments, and supports safe and comfortable maintenance. The base features a dual-panel structure to prevent warping with Niigata made cedar wood, and a combination of glass coating and white paint provides excellent water resistance. Finished in DOOA's signature white color, the surface is elegantly branded with the "DOOA" logo using a hot-iron stamp. Its natural texture and minimalist design highlight the floating impression of Neo Glass Air, blending seamlessly with various interiors. Available in three sizes—150×150 mm, 200×200 mm, and 300×180 mm—Neo Glass Wood Base can be safely placed on painted racks or wooden shelves without risk of surface damage. Balancing refined aesthetics with safety, this new addition from DOOA introduces a fresh, sophisticated approach to aquarium display.
