

DOOA, an inspiring brand, helps you enjoy aquatic plants more freely. Minimal and easy, and designed as a platform allowing everyone to nurture plants indoors. Feel closer to nature, and bring beauty into your life.

Water Softener
Size: Ø80×220mm

Reducing white calcium stains

New Release of WATER SOFTENER

It is a container to make soft water suitable for pouring into Glass Pot SHIZUKU and spraying on small Paludarium. If putting a pack of Paluda Clean PC that comes with the product in the container and pouring tap water and stirring the water, soft water TH: less than 10mg/L can be easily made. By using the treated water, white calcium stains on the glass surface can be effectively reduced.

The treated water (soft water) can be poured into a Glass Pot SHIZUKU or used for spraying Paludarium.

Put a pack of Paluda Clean PC that comes with the product in the container, pour 500mL of tap water into this product, and then shake it up and down about 200 times (about 2 minutes). About 50L of treated water can be made with one pack of Paluda Clean PC when TH of tap water is 100mg/L.

※Because the hardness of the original water is different depending on the areas, make sure to measure the hardness of the tap water in your area.
